

IRRIGATION SCHEDULE

Residents with **even ending addresses shall water Mon, Wed, and Fri**, and those with **odd ending addresses shall water Tues, Thurs, and Saturday**. Sunday is a catchup day for the common areas. This schedule is run purely on the honor system, and is not currently policed by the Association. This division of days is most crucial when water is cut back by the irrigation districts and we have less water coming into the system. If too many people are trying to pull water from the system the pressure drops, and then residents will see only a trickle of water coming out of their sprinklers. Dividing the days helps to distribute the water more evenly during these lower supplied times, and keep pressure up so everyone can water. This schedule can be modified at any time to assist with any irrigation issues or growing demand. The Association will announce irrigation concerns in the newsletter that goes out by email, so be sure to join the newsletter list. We always want to encourage good watering habits. Please reach out the Association if you should have any irrigation concerns.
