

FENCE STAIN

The community fencing has transitioned over time. Not only has the fencing standards improved, but also the stain. The original color was replaced with Kwal 8609 Tahoe Brown. Not long after that color became the new stain, Sherwin Williams purchased Kwal, and absorbed all their colors into their system. Unfortunately, they already had a Tahoe Brown, and so now there are multiple Tahoe Browns with Sherwin Williams. The 2 main stains that have been used in the community from Sherwin Williams are:

Old Tahoe Brown and ***South Tahoe Brown***.

If you are still transitioning from the old original stain, you should be upgrading to using South Tahoe Brown. However, if you already have the Tahoe Brown stain, and are doing touchups, to make sure you get the right color for your fencing, take a sample in with you to Sherwin Williams so they can get you the right match of Tahoe Brown.
